Visualising Solan; James Fisher Asset Information Services delivers for Premier

James Fisher Asset Information Services (JF AIS), part of James Fisher and Sons PLC, has strengthened its relationship with Premier Oil through the completion of a new digital survey of the Solan platform, West of Shetland.

The digital asset and data management specialist has supported the platform's commissioning programme since 2014 initially through the delivery of a 3D design model and partial digital survey.

This year's latest phase adds an asset-wide high resolution 360° photogrammetric layer, providing an intuitive, intelligent and visual front end to the latest version of the powerful digital twin solution, R2S. As a visual data hub for multiple data sources, the use of R2S will provide continuous value to the Solan project throughout its lifecycle.

F AIS's managing director comments:

'We are delighted to work with Premier Oil, further our commitment to the North Sea and support Premier's drive to champion the development and deployment of collaborative technologies. We look forward to further building our relationship with the Premier team and to support industry drive towards automation and digitalisation.'
